LETTER OF TRANSMITTAL

OFFICE OF PUBLIC SERVICE COMMISSION

*To His Excellency, Robert E. McNair, Governor of South
Carolina:*

Sir:

We have the honor to transmit herewith the Eighty-Seventh Annual Report of the Public Service Commission of South Carolina for the year ending June 30, 1965.

Yours respectfully,

JOHN J. SNOW, Chairman
EDWARD WIMBERLY, Vice Chairman
CLYDE F. BOLAND
ARTHUR D. AMICK
GUY BUTLER
CHARLES A. RICE
J. LEWIS MOSS
J. N. LAND, JR., Executive Secretary

ANNUAL REPORT OF THE PUBLIC SERVICE
COMMISSION OF SOUTH CAROLINA

To the General Assembly of South Carolina:

The Public Service Commission has the honor to respectfully submit for your consideration this its Eighty-Seventh Annual Report.

Below is the personnel of the present Commission and the Counties comprising the seven districts.

Sixth District

John J. Snow, Chairman _____ Hemingway, S. C.
Darlington, Dillon, Florence, Georgetown, Horry, Marion,
Marlboro, Williamsburg

Seventh District

Edward Wimberly, Vice-Chairman _____ St. Matthews, S. C.
Calhoun, Lee, Lexington, Orangeburg, Richland, Sumter

First District

Clyde F. Boland _____ Charleston, S. C.
Berkeley, Charleston, Clarendon, Colleton, Dorchester

Second District

Arthur D. Amick _____ Batesburg, S. C.
Aiken, Allendale, Bamberg, Barnwell, Beaufort, Edgefield,
Hampton, Jasper, Saluda

Third District

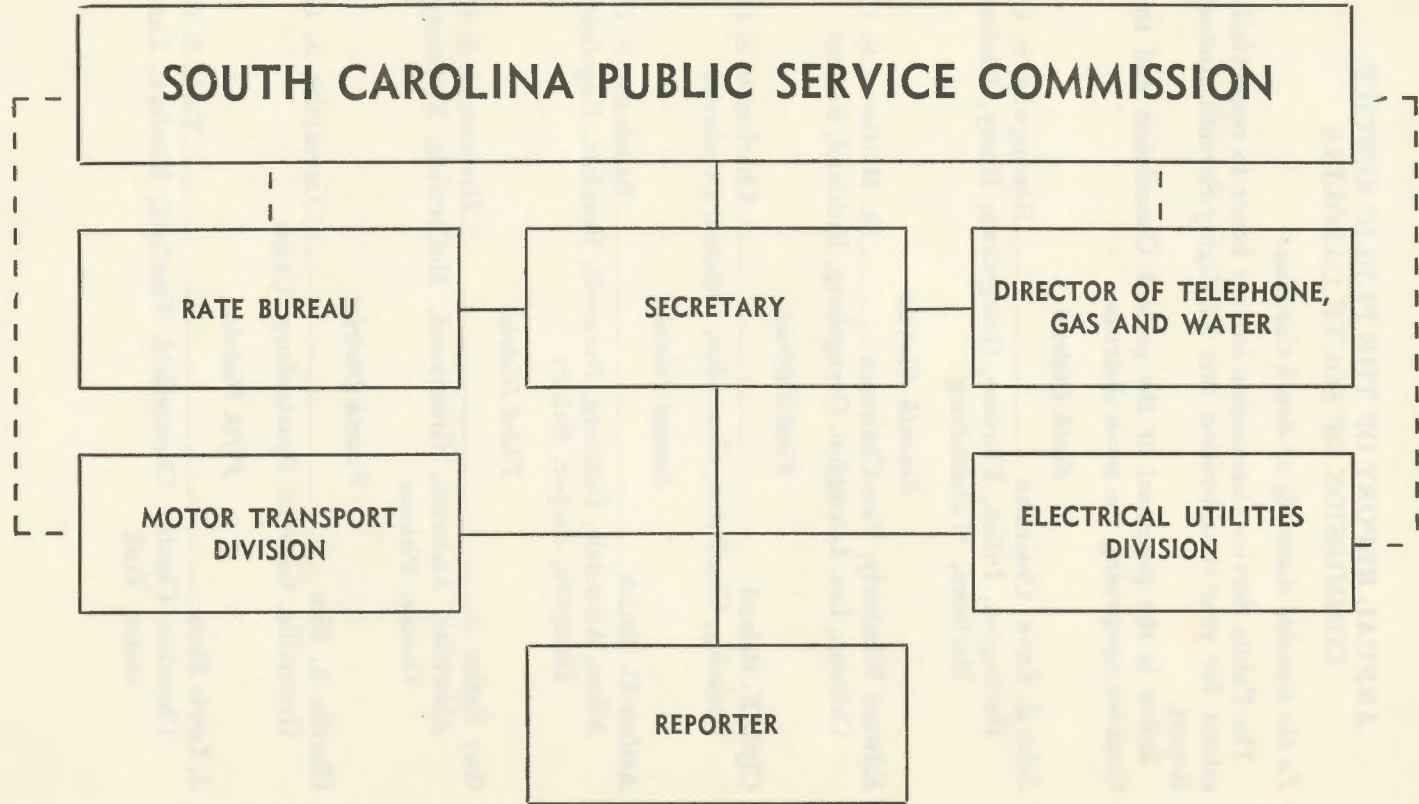

Guy Butler _____ Greenwood, S. C.
Abbeville, Anderson, Greenwood, McCormick, Newberry,
Oconee, Pickens

Fourth District

Charles A. Rice _____ Greenville, S. C.
Greenville, Laurens, Spartanburg, Union

Fifth District

J. Lewis Moss _____ York, S. C.
Cherokee, Chester, Chesterfield, Fairfield, Kershaw, Lan-
caster, York

The major rail lines operating in the State have continued to maintain their principal lines in good condition. Expenditures for their railroads, other than materials, fuel, and track laying and maintenance, particularly for passenger service during 1944, indicate a high level of maintenance work was done during the year. The smaller lines and branch lines have been maintained sufficiently to safely accommodate traffic being handled over them. Traction, power, and buildings are in generally satisfactory condition.

Motor Equipment

This report is divided into four sections as follows:

PART I—Railroad and Express Companies, Freight and Express Rates, Motor Carrier Rates.

PART II—City Bus Transportation, Gas Utilities, Telegraph Companies, Telephone Companies, Water Utilities.

PART III—Motor Transport Division.

PART IV—Electrical Utilities Division.

Part I

RATE BUREAU

Physical Condition of Railroads

The major rail lines operating in the State have continued to maintain their principal lines in good condition. Expenditures for ties, rails, other track materials, ballast, and track laying and surfacing, particularly for running tracks, during 1964, indicate a high level of maintenance work was done during the year. The smaller lines and branch lines have been maintained sufficiently to safely accommodate traffic being handled over them. Terminals, yards and buildings are in generally satisfactory condition.

New Equipment

Class I railroads serving the State, particularly such lines as the Atlantic Coast Line, Seaboard Air Line, and Southern Railway, continue to purchase and install in service new and improved equipment, namely:

Atlantic Coast Line

- 200—70 ton 50' 3½" Cast Steel Pulpwood Cars equipped with roller bearings.
- 400—100 ton Wet Phosphate Rock Hopper Cars equipped with roller bearings.
- 600—100 ton Covered Hopper Cars equipped with roller bearings.

Seaboard Air Line

- 9—2500 h.p. General Purpose Diesel Locomotives.
- 26—2000 h.p. General Purpose Diesel Locomotives.
- 200—70 ton 50' 6" all steel Box Cars with Roller Bearings and Cushion Underframes.
- 200—70 ton all steel Woodrack Cars with Roller Bearings.
- 150—100 ton all steel Covered Hopper Cars with Roller Bearings.
- 25—100 ton 2800 cubic feet all steel Pressure Discharge Cars equipped with Roller Bearings.

Southern Railway

- 60—GP-35 Diesel Locomotives.
- 100—100 ton 84' 4" Cushion Underframe Box Cars equipped with roller bearings.

The new equipment is being placed in service as rapidly as it is received from the builders. The high capacity cars permit reduced rates, with lowered unit transportation costs to shippers, and the roller bearings reduce friction and "hot-box" troubles, delays and expense, with resulting savings to the carriers.

Railroad Abandonments and Extensions

Since our 86th Report there have been no abandonments or extensions of rail properties in the State, and, at the close of our fiscal year, there were no proceedings of this nature pending.

Railroad Mergers

The long-pending merger of the Atlantic Coast Line Railroad Company and the Seaboard Air Line Railroad Company into the Seaboard Coast Line Railroad Company is still in the courts; now the Supreme Court of the United States. The proposed merger had been approved by the Interstate Commerce Commission, but the Federal District Court overturned the Commission's decision because, it said, the ICC was required to make specific findings in conformity with those which would have been required if Section 7 of the Clayton anti-trust act were applicable. The ICC failed to make those findings, the court said. Coast Line and Seaboard have filed jurisdictional statements with the Supreme Court asking the high court to overturn the district court's decision.

Railway Operating Revenues, Operating Expenses, and Operating Ratios

For the year ending December 31, 1964, South Carolina rail lines reported their operating revenues, operating expenses, and operating ratios, resulting from their entire operations in state and interstate commerce, as follows:

Reporting Company	Railway Operating Revenues	Railway Operating Expenses	Operating Ratio
Atlantic Coast Line	\$187,309,411	\$145,719,399	77.80
Carolina & Northwestern	3,852,931	2,107,240	54.69
Carolina Western	21,699	15,527	71.55
Clinchfield Railroad	23,704,526	14,347,792	60.53
Columbia, Newberry & Laurens	1,303,486	694,931	53.31
Georgia & Florida	1,803,120	4,104,222	227.62
Greenville & Northern	103,792	82,972	79.94
Hampton & Branchville	149,903	103,828	69.26
Lancaster & Chester	694,029	361,340	52.06
Pickens Railroad	45,690	69,129	151.30
Piedmont & Northern	5,837,213	3,157,223	54.09
Rockton & Rion*	61,151	61,118	99.95
Seaboard Air Line	174,667,972	137,230,233	78.57
Southern Railway	291,913,358	201,965,149	69.19
Ware Shoals	66,830	57,298	85.73

* Rockton & Rion is a common carrier by railroad intrastate in South Carolina only.

The operating ratios shown are simply percentage relationships of the operating expenses to operating revenues.

Railway Tax Accruals

Railway Tax Accruals of the South Carolina rail lines for the year ending December 31, 1964, as set forth in their annual reports to the Commission, were as follows:

Railroad	Total Railway Tax Accruals	All U. S. Govt. Taxes	Other than U. S. Govt. Taxes	
			All States	S. C. Only
A. C. L.	\$15,700,000	\$ 9,329,669	\$ 6,370,331	\$ 1,122,175
Car. & N. W.	294,598	186,505	108,093	28,143
Caro. Western	2,484	1,950	534	534
Clinchfield	2,472,007	1,293,396	1,178,611	48,163
C. N. & L.	261,850	204,623	57,227	57,227
Ga. & Fla.	1,197,976-D	1,271,863-D	73,887	497
Gr. & Nor.	6,786	4,686	2,100	2,100
H. & B.	7,847	6,522	1,325	1,325
L. & C.	113,383	89,728	23,655	23,655
Pickens	7,528	6,827	701	701
P. & N.	1,262,724	968,518	294,206	193,552
R. & R.	None	None	None	None
Seaboard	14,731,511	9,438,090	5,293,421	632,256
Southern	31,746,452	19,875,710	11,870,742	1,444,444
Ware Shoals	4,763	4,123	640	640

D—Denotes red figure—estimated tax benefit of 1964 net operating loss.

The U. S. Government Taxes indicated include income, old age retirement, unemployment insurance and other United States taxes. The South Carolina taxes include income, property, sales, gross receipts and license taxes. The sums under "All States," in some instances, include nominal amounts paid to the Government of Mexico, etc., not separated here for lack of space.

Rail Income

For the year ending December 31, 1964, two (2) South Carolina rail lines reported deficits in "Net Railway Operating Income," and two (2) reported deficits in "Net Income After Fixed Charges and Other Deductions." The term "Net Railway Operating Income" is the result of deducting from railway operating revenues the railway operating expenses and railway tax accruals, then further deducting from that figure, or adding to it, as may be proper in the circumstances, net rents from hire of freight cars, locomotives, etc., and joint facilities. This figure reflects the result of operating the company as a railroad. The term "Net Income After Fixed Charges and Other Deductions" reflects Net Railway Operating Income plussed-up by income from non-operating sources, less miscellaneous deductions from income, less fixed and contingent charges, and indicates corporate results. These selected income account items for the various South Carolina lines for 1964 are summarized below, and the figures shown for each carrier embrace its entire operations in both state and interstate commerce:

NAME OF REPORTING CARRIER	Net Railway Operating Income	Net Income After Fixed Charges and Other Deductions
Atlantic Coast Line	\$16,011,861	\$15,672,178
Carolina & Northwestern	919,062	154,644
Carolina Western	746	746
Clinchfield Railroad	6,866,177	Note
Columbia, Newberry & Laurens	161,241	193,026
Georgia & Florida	1,430,467-D	1,440,215-D
Greenville & Northern	2,152	4,034
Hampton & Branchville	47,054	41,601
Lancaster & Chester	168,292	315,598
Pickens Railroad	33,207-D	22,220
Piedmont & Northern	656,433	836,842
Rockton & Rion**	34	343
Seaboard Air Line	18,535,671	16,024,555
Southern Railway	44,630,340	35,418,018
Ware Shoals	672	1,329-D

D—Denotes red figure, or deficit.

** Rockton & Rion is a common carrier rail line intrastate in South Carolina only.

Note: The Clinchfield Railroad Company is the operating company for lessees: Atlantic Coast Line Railroad Company and Louisville & Nashville Railroad Company. Its income after fixed charges and other deductions is transferred to lessees. Income Account for the Year shows \$4,148,234 as "Income Transferred to Other Companies."

Passenger Train Service

During the past fiscal year, there were no passenger train service discontinuances within the State other than the customary winter-time on-and-off schedules operated by the Coast Line and the Seaboard primarily to accommodate the Florida traffic which peaks during the period running from about the middle of December until the end of March of each year.

Motor Carrier Tariff Matters

Other than routine matters in this field, upon the application, and after two hearings, the Commission authorized general commodity motor carriers operating within the State to increase their class and commodity rates five (5) percent to help offset increases they have experienced over the past five years or so in cost of equipment, materials and supplies, and payroll costs. Sugar, Unmanufactured Tobacco, Cotton in bales, and Fertilizer and Fertilizer Materials were not involved in the increase. The motor carriers proposed selective increases, somewhat higher on some descriptions of traffic than on others, which met with considerable shipper opposition, but the amended application for 5% generally permitted withdrawal of shipper objections. The increase became effective January 1, 1965.

Bulk petroleum products carriers, hauling in tank-truckloads, restated their rates in cents-per-gallon, in lieu of cents-per-hundred-pounds, and related their point-to-point commodity rates on this traffic to highway distances computed from the several deep-water terminals and pipeline outlets to substantially every place of identity in the State. Mileage scales intended for sporadic movements not specifically provided for were also related to highway distances. Formerly, for competitive reasons, motor carrier rates on this traffic were substantially the same from and to the same points as rail tank-carload rates, made on rail distances.

Rate Applications

During the fiscal year ending June 30, 1965, the Commission's Rate Bureau handled 262 applications and matters of similar nature relating to rail, express and motor carrier tariff changes, and rail and express services and facilities. The greater portion of these applications dealt with rate reductions and tariff liberalizations, which we were able to dispose of informally, but

matters that could not be so disposed of were assigned to the formal docket for public hearing and decision. In all cases where protests and hearing requests were filed, the matters were formally set for hearing before disposition.

Rail Accidents

Several train wrecks and derails occurred within the State during the past fiscal year, but fortunately these did not result in personal injuries or deaths. Grade crossing accidents resulting from collisions between moving trains and highway vehicles accounted for most of the accidents reported to the Commission during the year.

MILEAGE OF ROAD OPERATED IN SOUTH CAROLINA (Single or First Main Track) December 31, 1964

Name of Railroad Company	Number of Miles
Atlantic Coast Line Railroad Co.	1,083.54
Carolina & Northwestern Railway Co.	81.07
Carolina Western Railroad	4.50

	L. S. Jeffords, President	Jacksonville, Fla.

Part II

CITY BUS TRANSPORTATION

The Public Service Commission has jurisdiction over city bus transportation where the bus service supersedes electric street railway transportation. This gives the Commission jurisdiction over city bus transportation in Anderson, Charleston, Columbia, Greenville, and Spartanburg.

Gasoline and diesel buses are operated in South Carolina by the Duke Power Company at Anderson and Spartanburg, by the Greenville City Coach Lines, Inc., at Greenville, and by the South Carolina Electric and Gas Company at Charleston and Columbia.

During the year 1964, the above named bus companies transported 18,569,309 passengers as compared to 18,755,660 in 1963. This was a decrease of 186-351 passengers in 1964 compared to 1963. Therefore, this is still a reduction of passengers transported of approximately 59% since 1950.

During the fiscal year 1964-1965, a number of changes were made in bus routes and schedules in order to make the most economical use of the facilities of the various bus transportation companies operating in this State.

GAS UTILITIES

Natural gas is brought into South Carolina from the gas fields of Louisiana and Texas by the Transcontinental Gas Pipeline Company and the Southern Natural Gas Company. Transcontinental's pipeline passes through the upper part of the State, while Southern terminates at a point near Aiken, S. C. These two pipeline companies furnish gas in South Carolina from their facilities to the privately owned gas authorities and municipally owned systems.

The Federal Power Commission has jurisdiction of Transcontinental Pipeline Company and the Southern Natural Gas Company, thereby having control over the price of, and allocation of, natural gas brought into South Carolina.

During the year, the Commission participated in a number of proceedings before the Federal Power Commission in an effort to protect the interests of the people and the gas utilities operating in South Carolina.

Many communities in South Carolina are receiving natural gas service through facilities owned by municipalities, or gas authorities, over which this Commission has no jurisdiction.

The demand for natural gas service in the several cities in South Carolina has continued to increase and the privately owned gas utilities have been expanding their facilities accordingly to serve industry and other customers as fast as possible whenever feasible.

The total number of gas customers served by the privately owned gas utilities under the Commission's jurisdiction increased from 99,903 to 103,419 in 1964. This was an increase of 3,516, which reflects an increase of approximately 3.5%.

A number of complaints were received by the Commission as to the service and charges from customers of the gas companies, which were handled informally during the fiscal year 1964-1965.

TELEGRAPH COMPANY

The Western Union Telegraph Company is the only telegraph company operating in South Carolina, and during the year continued its program of providing telegraph service to keep pace with the nation's growth. Local and national telegraph service has been progressively improved as the result of a planned program by Western Union to modernize and mechanize its plant and facilities. This program has brought in a new nationwide network of automatic transmission facilities which has largely substituted electronic methods for the previous manual handling of telegrams.

As of December 31, 1964, 255 telegraph, agency or commission offices in South Carolina were linked with national and international telegraph facilities through Western Union's message center at Atlanta, Georgia, one of several strategically located reperforator switching centers which provides automatic and semi-automatic relay of telegrams between cities. Each high speed center serves from one to six states and each is provided with direct channels to other centers.

Western Union also leases private wire "closed circuit" telegraph and facsimile systems to industry and government.

A few complaints about telegraph service received by the Commission were handled informally and adjusted without formal hearings.

TELEPHONE COMPANIES

The telephone companies operating in South Carolina continued to enlarge their telephone plants during 1964. The manufacturers of telephone equipment have been unable to keep up with the demand. Dial Equipment is now in operation in all exchanges throughout South Carolina.

The telephone companies operating in South Carolina increased the number of telephones in service in the State from 670,324 on December 31, 1963, to 716,885 on December 31, 1964, a net increase of 46,561 telephones during the year 1964, which reflects an increase of 6.9%. Of this total number in service on December 31, 1964, 130,485 were classed as farm stations, which does not include a comparatively large number of telephones in rural areas that are classed as urban but are not on regular rural lines. In addition to the above numbers, there are 7,197 rural telephones owned by the subscribers. The telephone companies operating in the State have been very active in expanding their telephone plants to furnish service to those making applications for same and most all applicants were taken care of with very few exceptions.

The increase in costs of telephone equipment, salaries, wages and other operating costs has caused a number of telephone companies operating in the State to apply to the Commission for authority to increase their rates and charges for telephone service. As prescribed by law, public hearings were held on each application for adjustments in telephone rates and charges and, upon giving consideration to all testimony presented at these hearings and information in the files of the Commission, rate adjustments were authorized on all applications which, in the opinion of the Commission, were just and reasonable.

Toll charges were eliminated by the establishment of Extended Area Service between Marion and Florence, between Marion and Mullins, between Barnwell and Williston, between Blackville and Williston, between Rock Hill and York, between St. George and Harleyville, and between Pinewood to Sumter, North Sumter, Shaw View Heights and Statesburg, during the year 1964.

Work was completed on the conversion from manual to dial operation on the exchange at Marion, which was the last manual exchange in South Carolina.

A new #5 Crossbar office was established at Berea in the Greenville Exchange. John's Island trailer office in the Charles-

ton Exchange was replaced with a #355 dial office, and a new #5 Crossbar office was placed into service in the Lambs area, and in the Sherwood Office for the purpose of providing Centrex service to the Navy Yard.

Toll rates were reduced by applying "after 9" rates beginning 8 P.M. weekdays and all day Sunday and applying "night" rates to daytime Saturday.

Additional construction was started on new Central Office buildings in the Sumter Highway, Arden, and St. Andrews sections of Columbia.

During the year a hearing was held before the Commission concerning the sale of Home Telephone Company of Simpsonville, S. C., to the Apache Corporation of Minneapolis, Minnesota.

"Aid to construction charges" on existing rural projects were eliminated and spring cord charges were removed in the area served by Southern Bell Telephone and Telegraph Company.

Centrex Service was established for the State Government Offices in Columbia, South Carolina.

The Educational Television Network was expanded to a statewide system in September, 1964, with service to 205 public schools, 10 colleges, 11 hospitals and 2 private schools, and 16 other agencies.

As of December 31, 1964, six rural telephone cooperatives have been organized in South Carolina to serve rural areas as follows:

1. Farmers Telephone Cooperative, Inc., to serve Williamsburg, Georgetown, Clarendon, Florence, Lee and Sumter Counties. This Cooperative is operating fourteen exchanges;
2. Horry Telephone Cooperative, Inc., to serve in Horry County and a small area in Georgetown County. This Cooperative is operating seven exchanges;
3. Palmetto Rural Telephone Cooperative, Inc., to serve in Colleton County and a small area in Bamberg County. This Cooperative is operating five exchanges;
4. Piedmont Rural Telephone Cooperative, Inc., to serve in Laurens, Abbeville, Newberry and Spartanburg Counties. This Cooperative is operating four exchanges;
5. Sandhill Telephone Cooperative, Inc., to serve Chesterfield, Lancaster and Kershaw Counties. This Cooperative is operating six exchanges;

6. West Carolina Rural Telephone Cooperative, Inc., to serve in Abbeville and McCormick Counties and a small area in Anderson County. This Cooperative is operating five exchanges.

The Commission received many requests for assistance in obtaining telephone service from applicants who were unable to secure service on application to the telephone companies and a great deal of work has been done by the Commission in assisting these applicants in securing service.

WATER UTILITIES

The majority of water utilities operating in South Carolina are owned and operated by municipalities and public water districts and are not under the jurisdiction of the Public Service Commission. The cities in which the water systems are privately owned and subject to the jurisdiction of the Public Service Commission are Anderson, St. George and Walterboro. In addition, there are a number of small water systems at beach resorts and real estate developments which are also under the jurisdiction of the Commission.

Complaints were received by the Commission from customers of water utilities as to service and charges at some of the beach resorts and real estate developments. Most complaints were handled informally with public hearings being held by the Commission when necessary.

The increase in costs of water works equipment, salaries, wages and other operating costs has caused a number of water utility companies operating in this State to apply to the Commission for authority to increase their rates and charges for water service.

As prescribed by law, public hearings were held on each application for adjustment in water rates and charges and, upon giving consideration to all testimony presented at these hearings and information in the files of the Commission, rate adjustments were authorized on all applications which, in the opinion of the Commission, were just and reasonable.

TELEPHONE COMPANIES OPERATING IN SOUTH CAROLINA, JUNE 30, 1965

Name of Company	Exchanges	Managing Officer	Address
Bluffton Telephone & Appliance Co., Inc.	Bluffton, S. C.	Mrs. J. L. Cantrell, President	Bluffton, S. C.

Part III

MOTOR TRANSPORTATION DIVISION

The work of this Division is to enforce the Motor Vehicle Carrier Law of the State, Sections 58-1401—58-1501 of the South Carolina Code of Laws, 1962, as amended. The Law provides for the regulation, supervision, and control of persons, firms, corporations, etc., operating motor vehicles used in the business of transporting persons or property for compensation over the highways of the State, and imposes license fees to cover the cost of administration of the Law.

With the growth of the motor carrier industry in this State, together with the better enforcement of the Motor Carrier Law made possible by increased enforcement facilities, the work of this Division has rapidly increased, as evidenced by revenue receipts as shown in the following, through the fiscal year 1962-1963. However, beginning in 1962 the General Assembly for three successive years, passed legislation which reduced license fees for Class D, E and F Certificate holders by twenty-five per cent per year. This reduction is shown in the revenue as collected since that time along with a portion of the motor vehicle registration fees collected by the South Carolina Tax Commission and credited to the Motor Transportation Fund beginning with the fiscal year 1962-1963.

During the period of this report, ninety-seven hearings were held in connection with motor transportation matters.

In connection with Class A (regular route bus) carriers, two hearings were held in connection with complaints against amendments to Certificates and changes in schedules; nine applications for Restricted Class A Certificates were heard, of which eight, covering 393.5 miles of highway were granted, and one dismissed. Forty-two applications for Class E (motor freight service over irregular routes) Certificates were heard, of which thirty-eight were granted, two denied, one dismissed, and one pending; six applications to amend Class E Certificates were heard, of which five were granted and one is pending; six applications for transfer of Class E Certificates were heard, four of which were granted, two denied and one is pending; one application for lease of Class E Certificate was heard and approved; and one application to manage and control operations of a Class E Certificate holder was denied. Twenty-three applications for Class F (motor freight service under contract) Certificates were heard, twenty of which were granted, one denied and two dismissed; one application to amend a Class F Certificate was

denied; and two Class F Certificates were cancelled upon the granting of Class E Certificates to these Certificate holders. Rules to Show Cause why Certificates of Public Convenience and Necessity should not be revoked for failure to comply with the Motor Vehicle Carrier Law of South Carolina were issued against eighty carriers, resulting as follows: two Class A Certificates were revoked; four Restricted Class A Certificates were revoked; Rules against two Class C Certificate holders were dismissed; four Class C Certificates were cancelled and twenty-seven Class C Certificates revoked; Rules against eight Class E Certificate holders were dismissed, three Class E Certificates were suspended, one Class E Certificate was cancelled and nine revoked. Rules against four Class F Certificate holders were dismissed, Two Class F Certificates were suspended, two cancelled, and twelve revoked.

In addition to matters which were disposed of after public hearings, two hundred and eighteen Orders were issued disposing of motor transportation matters without hearings. In connection with Class A, two Certificates of Public Convenience and Necessity were granted, four Certificates were amended, 1 transferred, three suspended, and one sale of stock under Class A was approved; two Restricted Class A Certificates were granted, one amended, one transferred, three suspended, four cancelled, and one lease terminated. In connection with Class C operations, fifty-one Certificates were granted, two transferred, two suspended, and thirty-six cancelled. In connection with Class D Certificates, application to transfer two Certificates was dismissed. In connection with Class D Restricted Certificates, one was granted, one amended and eight Certificates suspended. In connection with Class E Certificates, two were amended, seventeen transferred, six suspended, four cancelled and one reinstated; one transfer was temporarily approved, one amendment denied, three transfers dismissed and one assignment of a lease under Class E was temporarily approved, four Petitions for rehearing, of Class E applications, were denied; four Class E Certificates, Restricted to Interstate Commerce Only, were granted, one transferred, one suspended and four cancelled. In connection with Class F, twenty-one Certificates were granted, eleven amended, four transferred, two suspended, twenty-one cancelled, and one Petition for rehearing, of Class F applications, denied.

4. From (Augusta, Georgia) S.C.-Georgia Line near Beech Island, S. C., over S. C. Highway 28 via Barnwell and Allendale to Yemassee, S. C.; thence over U. S. Highway 21 to Beaufort, S. C.; thence over S. C. Highway 281 to Port Royal, South Carolina.

5. From Beech Island, S. C., south to Jackson, S. C., over S. C. Highway 125 with an alternate route over an unidentified road between Jackson and the junction of that unidentified road and S. C. Highway 28.

Restricted: In accordance with the application to the handling of the business of the Atlantic Coast Line Railroad Company; and, Further Restricted: In accordance with the application against pick-up and delivery except at railroad company stations; and, Further Restricted: To prohibit the grantee of this Certificate from entering into contracts with other Class D, E or F Certificate holders for pick-up and delivery service outside of the commercial zones of the railroad company stations which grantee is hereby authorized to serve.

Certificate No. 163D, **State Motor Lines**, Hartsville, S. C., operating between Spartanburg, South Carolina, and a fifteen mile radius thereof, and Darlington, South Carolina, and a fifteen mile radius thereof, via Camp Croft, Pacolet, Jonesville, Kelly, Lockhart, Chester, Richburg, Fort Lawn, Lancaster, Funderburk, McBee and Hartsville, over State Highways Nos. 9, 903 and 151; Off Route Points: Great Falls and Rock Hill.

Certificate No. 410C, **State Motor Lines**, Hartsville, S. C., operating between N.C.-S.C. State Line (Charlotte, North Carolina), and Lancaster, South Carolina, over U. S. Highways 21 and 521.

Certificate No. *415C, **Watson-Wilson Transportation System, Inc.**, Omaha, Nebraska, operating between the S.C.-Ga. State Line and Charleston, S. C., over U. S. Highway No. 78; and, Between the S.C.-Ga. State Line and Greenville, S. C., over U. S. Highway No. 29. As authorized by the Interstate Commerce Commission under Certificate No. MC 70451 SUB 237.

Part IV

ELECTRICAL UTILITIES DIVISION

The Electrical Utilities Division was organized and operates under an Act of the General Assembly, regulating persons, corporations, etc., engaged in the generation, transmission, delivery, or furnishing of electricity for lighting, heating, power, etc., as approved by the Governor on April 8, 1932.

The following report has been prepared as is required by this Act in order to outline the activities of this Division during the fiscal year ending June 30, 1965.

Electrical Utilities Division

Electrical Utilities Division is charged with regulating the privately-owned electric utilities operating in this State looking toward the establishment of fair and adequate rates for electric service rendered to customers within the State, and insuring that the service rendered is adequate and under rules and regulations prescribed by the Acts of the General Assembly.

The Division must also determine that the Utilities under Commission jurisdiction do not earn more than a reasonable return upon the fair value of utility property devoted to the public service.

The Division constantly is reviewing the financial conditions and operations of the companies, and recommending to the Commission necessary readjustments in rates and rate schedules and requesting the various companies to reinforce their electric supply by the construction of additional generating capacity or the addition of larger conductors, more transformer capacity or additional lines. Service complaints are investigated by the personnel of the Division, who, also make electric meter tests and handle such other duties as are delegated to the Division in accordance with the Regulatory Act.

During the 1964-65 fiscal year, the several electric utilities under the jurisdiction of the Commission continued to improve their systems to make more and better service available to the customers on their lines.

All of the electrical utilities under jurisdiction of this Commission are planning and building generating plants and lines

so that electric power will always be available to its customers and any others who might locate there.

Carolina Power & Light Company has completed and put into operation a 230 KV transmission line between Florence and Rockingham, N. C., and power from the Robinson Plant at Hartsville can be transmitted into North Carolina. An extension of this line connects to Duke Power Company near Oakboro, N. C. Since Carolina and Duke are both members of the CARVA pool, power can flow both ways over this line as well as over the numerous other lines that cross the state boundary.

New 110 KV substations are being constructed in Andrews, Pageland, Pamplico, Olanta and West Sumter. Substations at Camden and Bennettsville are being changed. New distribution and transmission lines have been completed to provide more and better service to customers of Carolina.

Carolina has announced that they are considering the installation of a nuclear powered generating station to provide the next block of power required by their customers. Final decision as to type of fuel and plant location should be made before the end of this year—1965.

Duke Power Company has announced plans for the construction of a 2,000,000 Kilowatt steam-electric generating plant to cost approximately \$280,000,000 and to be located between Anderson and McCormick along the Savannah River. Plans for this Plant are in conflict with proposals for Federal construction of additional hydro-electric generating stations and dams on the Savannah River between the Hartwell and Clark Hill Projects. It is expected and hoped that Congress will eventually pass the necessary legislation to permit Duke Power Company to proceed with the construction of the initial installation of 700,000 Kilowatts, which will cost \$91,000,000.

Delay in securing Congressional approval of Duke plans for the Savannah River Plant has resulted in the start of construction of a large steam-electric generating plant on Lake Norman which was formed when the Cowan's Ford Dam was completed just above Charlotte early this year. The Cowan's Ford Plant completes the economical development of the Catawba-Wateree River from its headwaters above Marion, N. C. to the fall line near Camden where the Wateree Plant has been in service since 1919.

Plans for the Savannah River Plant have not been abandoned, and as soon as the Federal approval can be obtained, and forecasts show the need of additional power in the Savannah River area, this plant will be built to help provide more power for South Carolina customers.

On January 2, 1965, Duke announced plans for the construction of the Keowee-Jocassee Project in Oconee and Pickens Counties to cost about \$700 million dollars. Since the construction of the three proposed dams would possibly affect navigation on the Savannah River, Duke must receive a License from the Federal Power Commission. The License application has been made and as yet no Hearing date has been set. The U. S. Department of Interior asked F. P. C. for permission to intervene in the Application. Secretary Udal has withdrawn the Department of Interior objection, but The Tri-State Power Committee, representing Cooperatives in the Carolinas and Georgia, has also intervened. It is hoped that Tri-State will withdraw its objection so that Duke Power Company can begin the construction of one of the largest privately-owned developments in the Southeast.

The Federal Power Commission tabulates data on practically all of the electric generation in the United States and these data indicate that the privately-owned utilities providing electric service in South Carolina are well and efficiently managed and are providing good service at rates that are usually below the rates in effect in other parts of the nation. The latest information available from this source indicates that Duke Power Company plants ranked fifth in the nation with a system heat rate of 9578 BTU per Kwhr. South Carolina Electric & Gas Company ranked sixth with a system heat rate of 9647 BTU per Kwhr and Carolina Power & Light Company ranked tenth with a system heat rate of 9834 BTU per Kwhr.

The three newer units at Duke's Allen Plant ranked 13, 16 and 17 as the most efficient units in the United States.

The first unit at Canady's Station of South Carolina Electric & Gas Company (the first unit of this plant was put in operation in 1963) ranked eighth, and Duke Power Company's Allen Plant ranked eleventh in the list of most efficient plants in the country. Canady's reported a net heat rate of 9,025 BTU per Kwhr. and Allen reported a net heat rate of 9,085 BTU per Kwhr. In 1962, Allen reported a net heat rate of 9,062 BTU per Kwhr.

The generating plants of the privately-owned utilities serving South Carolina customers are economically constructed and operated and the people of this State benefit through good service and reasonable rates.

The installation and operation of large, modern, very efficient generating plants permits the Companies to continue to sell electric power at rates established years ago. Electric power is one item that has not increased in cost during the past several years. Power from these plants and other plants in North Carolina is made available to South Carolina customers over the many high voltage lines crossing into South Carolina.

In order to provide more and better service, the distribution voltage in a number of towns has been raised.

A number of new distribution sub-stations have been built to provide more and better service to those faster growing areas.

All of the utilities under jurisdiction of the Commission have spent considerable money in rebuilding present distribution systems, adding larger wire and transformers, etc., and in extending service into areas not previously having dependable service available.

Higher voltage lines of greater capacity are required to provide the ever increasing power to permit South Carolinians to "Live Better—Electrically."

South Carolina customers are receiving some power from the Clark Hill Project through transmission lines of South Carolina Public Service Authority, the Greenwood Electric Power Commission (Buzzards Roost), and South Carolina Electric and Gas Company. The operating agreement between the Authority and South Carolina Electric and Gas Company continues in effect to the benefit of both utilities. It is hoped that electric power now being generated at the Hartwell Project will soon be made available to South Carolina customers.

Duke Power Company has entered into a contract with South-Eastern Power Administration for the delivery of South Carolina's portion of the power available from the Hartwell Project, and power from this project is now flowing to South Carolina preference customers.

The major utilities operating in South Carolina as well as neighboring utilities in Georgia and North Carolina are connected by numerous high voltage transmission lines and, in case

of emergency, power is transmitted between the interconnected companies affording the ultimate consumer a better and more continuous supply of power.

Carolina Power and Light Company, Duke Power Company, South Carolina Electric and Gas Company and Virginia Electric and Power Company have signed an agreement for pooling capacity and coordinating the construction of transmission lines and generating stations in order to permit maximum use of recent technological developments "to attain even greater security and economy of service." These Companies are now interconnected and this agreement provides for even closer coordination between the generation and transmission of electric power in North Carolina, South Carolina and a large part of Virginia. Generally speaking large generating units can produce power more economically than small units, and these companies plan to install larger units and to pass on to the consumer the savings.

The larger utilities operating in South Carolina have a new "Area Lighting Service" which is being made available to individual customers and to whole communities living outside city limits. Many thousands of these lights have been installed in the rural area of our State.

The South Carolina residential electric customer enjoys the lowest average rate in the history of the State, and, in addition is able to purchase electric service at a price which is well below the national average for privately-owned electrical utilities. A chart has been prepared comparing the residential electric consumption and the average price paid by the South Carolina consumers with the average consumption and average price paid by the average United States consumer. This chart is printed on one of the following pages.

There are now over 50,000 miles of rural and suburban electric distribution lines serving nearly half a million rural and suburban customers in South Carolina. These customers are provided electric power by the privately-owned utilities, the Municipalities owning and operating their own distribution systems, the Federally financed REA Cooperatives, the South Carolina Public Service Authority (Santee-Cooper) and the Greenwood County Electric Power Commission. It is generally believed that any area not adequately served at this time will be able to obtain electric service in the very near future.

It is believed that there is no power shortage in South Carolina and further, that the organizations in South Carolina who generate and sell electric power will provide adequate power at reasonable rates for the future needs of this State. In fact, at this time there are new generating facilities under construction or in the planning stage by both publicly-owned and privately-owned utilities.

A number of charts and tables have been prepared to show the growth of the privately-owned electric industry in South Carolina and are presented elsewhere in this Report.

Rates

The downward trend in electric rates enjoyed by the average residential electric consumer in recent years has begun to level off. The rapidly rising costs of all things necessary in providing good service will probably require rate increases in order to protect the financial condition of the several electric companies, so that the companies can continue to finance, at a reasonable rate, the many additions required in providing good service.

The South Carolina residential electric consumer continues to enjoy more electric service at a cheaper rate than the average consumer throughout the United States. The average rate paid by South Carolina residential consumers for the year ending December 1964 was about 31% of the average rate paid by the same consumers in 1932. The average United States residential consumer purchases electric energy at an average rate of about 19% more than the average rate paid in South Carolina by the consumers of the privately-owned electric utilities.

Although the downward trend in electric rates in the United States as a whole has been reversed and nationally the statistics indicate that electric rates are rising, the electric customers in South Carolina continue to enjoy electric service at declining rates which are well below National Average Rates.

The increase in use of electric service together with the installation of large, very efficient generating stations, and efficient operations of the privately-owned utilities in South Carolina will allow even lower average rates, unless the costs of everything that goes into the production, transmission and distribution of electric service rise faster than during the past several years.

The Federal Power Commission Publication R-65, "Typical Electric Bills—1964" indicates that the average United States bill for 250 Kwhrs for Residential Service was \$7.43 on January 1, 1964. Of the 81 communities in South Carolina with over 2,500 population, there was not a single case where an electric bill for Residential Service was as high as \$7.43, in fact the highest bill for 250 Kwhrs for Residential Service was only \$7.40 and only 23 of the 81 communities would pay a bill of more than \$7.00. In 18 communities the bill would be between \$6.50 and \$7.00. In 36 communities the bill for 250 Kwhrs would be between \$6.05 and \$6.50, while in three communities the bill would be less than \$6.00 with one community selling 250 Kwhrs for residential service at less than \$5.00.

The 430,208 residential customers in South Carolina served by the privately-owned utilities used 2,744,677,111 Kwhrs, with an average annual use of 6,380 Kwhrs, for an average annual bill of \$123.26 or an average monthly bill of \$12.33 at an average rate of 1.932 cents per Kwhr. The average annual Kwhr used by the average United States residential consumer was 4,701 for which he paid 2.30 cents per Kwhr.

Since the average annual residential use in South Carolina was 6,380 Kwhrs or a monthly use of 531 Kwhrs, the following data from the Federal Power Commission's Publication R-65 are based on bills for 500 Kwhrs for residential use in the United States on January 1, 1964 was \$10.61, with an average rate of 2.12 cents per Kwhr. Of the 81 communities in South Carolina with a population of 2,500 or more, there were only 29 communities with bills higher than \$10.12 for 500 Kwhrs for residential service, and of these only one community had a bill of over \$11.60 for 500 Kwhrs.

There were 54 communities in which a bill of less than \$10.12 would be rendered for 500 Kwhrs of residential service. Of these 54 communities 51 would receive bills below \$10.00.

Nineteen communities would receive bills of less than \$9.50 and of these, three communities would receive a bill of \$8.00 or less.

The average residential customer in South Carolina served by the privately-owned utilities uses 6,380 Kwhrs for which he receives an average bill of \$123.25 with an average rate of 1.932 cents per Kwhr. The national average residential customer uses

only 4,701 Kwhrs for which an average annual bill of \$108.12 is rendered at an average rate of 2.30 cents per Kwhr.

The average residential customer in South Carolina served by the privately-owned utilities pays an annual bill which is about 14% higher than average United States residential customers pay, but the South Carolina average residential customer receives 35.7% more power for the 14% increase in his Annual Bill.

The average rate paid in South Carolina is 19% lower than the average rate paid by all residential customers in the United States, including those customers in the Tennessee Valley and other areas where publicly-owned power is provided. In South Carolina, if Santee-Cooper residential statistics were included with those of the privately-owned utilities, the South Carolina average rate probably would be even lower.

There are 1,597 large industrial customers of the privately-owned utilities in South Carolina who purchased 6,332,885,622 Kwhrs at an average rate of 7.38 mills per Kwhr, which is well below the power rates in a large part of this nation.

The commercial and industrial rates in South Carolina have been reduced from time to time and are considerably below the national average figure. It is interesting to compare the average price of 1.602¢ per kilowatt hour paid for all electrical energy sold to ultimate consumers in the United States with the average price of 1.185¢ per kilowatt hour paid by ultimate consumers of the privately-owned utilities in South Carolina. The South Carolina average does not include the large amount of power sold by the South Carolina Public Service Authority nor that sold by other publicly-owned systems in the State. Were Santee-Cooper sales included, the South Carolina figure would be even lower than shown. Industries now located within South Carolina and other industries desiring reasonable electric power rates will find that electric power can be secured throughout practically the entire State at very reasonable rates.

It is believed that there is no power shortage in South Carolina and further, that the organizations in South Carolina who generate and sell electric power will provide adequate power for the future needs of this State. In fact, at this time there are new

generating facilities under construction or in the planning stage by both publicly-owned and privately-owned utilities.

A number of charts and tables have been prepared to show the growth of the privately-owned electric industry in South Carolina and are presented elsewhere in this Report.

Notes: *** Classification of sales shown in reports to Commission does not permit segregation of "Street Lighting, Municipal Use, etc." into "Street Lighting etc., "To Municipalities For Re-Sale," To Other Utilities, For Ultimate Consumers."

** First South Carolina Rural Electrification Authority line energized in Fall of 1936—S. O. REA lines were later taken over by REA Cooperatives who are now operating rural lines in South Carolina.

* It is probable that some energy shown in this column should be shown as "To Municipalities—For Re-Sale" "To Other Utilities—For Re-Sale" or "Street Lighting—Municipal Use, etc."

† In addition, Duke Power Company provided deficiency power for SEPA (Hartwell Project) preference customers in 1964—8,436,847 KWH.

**SALE OF ELECTRIC POWER IN SOUTH CAROLINA BY
TEN (10) PRIVATELY OWNED UTILITIES IN 1964**

CLASS OF SERVICE	Kilowatt- Hours Sold	No. of Customers	Revenue
Residential	2,744,677,111	430,208	\$ 53,025,508.53
Commercial and Small Power	1,547,346,833	68,226	28,641,906.23

Deficiency Power Provided for SEPA (Hartwell Project) Preference Customers	8,436,847	1	28,411.00
Other Electric Revenue			1,627,667.03
Total	12,551,733,580	502,372	\$ 145,610,278.77

**ELECTRIC ENERGY ACCOUNT OF TEN (10) PRIVATELY OWNED ELECTRIC UTILITIES
OPERATING IN SOUTH CAROLINA—1964**

	Kilowatt Hours
Steam Generation	7,865,431,000
Hydro Generation	2,255,842,000
Gas Turbine Generation	1,280,000
Nuclear Generation	39,280,000
Total Generation	10,161,833,000
Purchase Power	384,765,323
*Interchange Power—Received	397,000
Received from N. C. Lines	2,804,162,945
**Total Provided	13,351,157,368
Energy Sales	12,543,296,733
Deficiency Power Provided for SEPA (Hartwell Project) Preference Customers	8,436,847
Company Use	17,460,131
*Interchange Power—Delivered	3,191,000
Losses and Unaccounted For	778,772,657
Total	13,351,157,368

*Daily flow of power and energy between Carolina Power & Light Company, Duke Power Company, South Carolina Electric & Gas Company and members of Interconnected Systems Group is not included in these totals.

**In addition, Duke Power Company wheeled for SEPA (Hartwell Project) 121,136,044 KWH to preference customers in South Carolina and 96,832,141 KWH to preference customers in North Carolina.

**ANNUAL KILOWATT-HOURS GENERATED IN SOUTH CAROLINA BY PRIVATELY
OWNED ELECTRIC UTILITIES**

* Water Heating Required on this Schedule.

** All-Electric Service.

*** Effective November thru April for All-Electric Service.

**Formal Orders Issued by the Commission on Data Furnished and
Recommendation Made by the Electrical Utilities Division**

Order E-928, issued July 22, 1964, authorized Carolina Power & Light Company to adopt Public School Service Schedule PS-2D superseding Public School Service Schedule PS-2C.

Order E-929, issued July 22, 1964, authorized Carolina Power & Light Company to adopt Apartment House Service Schedule AH-1.

Order E-930, issued July 22, 1964, authorized Carolina Power & Light Company to adopt Church Space Heating Rider No. 11A, to avoid inequities arising from existing rate schedules for churches.

Order E-931, issued September 3, 1964, authorized Duke Power Company to issue 11,464,447 shares of its common stock, without nominal or par value, in order to accomplish a stock split on a basis of two for one.

Order E-932, issued September 3, 1964, set a date of September 16, 1964, for hearing Duke Power Company's request to sell certain electric lines and equipment to the City of Gaffney.

Order E-933, issued September 16, 1964, authorized South Carolina Electric & Gas Company to adopt new Rate 17, effective October 1, 1964, superseding Rate 17, issued November 1, 1961. New Rate 17 will make available to municipalities a new lamp identified as: "7,000 Lumens (Mercury) Open Type Globe (Non-directional) @ 3.25 each."

Order E-934, issued September 17, 1964, set a date of October 7, 1964, for hearing Clemson University's request to sell to Duke Power Company the electric and water distribution system located off the University campus.

Order E-935, issued September 30, 1964, authorized Carolina Power & Light Company to adopt House Construction Service Schedule HC-1.

Order E-936, issued October 7, 1964, authorized Duke Power Company to sell to the City of Gaffney certain electric distribution lines and equipment located in the recently annexed area of the City of Gaffney known as the Pleasant Meadows area. A Certificate of Convenience and Necessity was granted to Duke to permit that Company to discontinue service to this area when service was begun by the City of Gaffney.

Order E-937, issued October 7, 1964, authorized Clemson University to sell to Duke Power Company the electric and water distribution system located off the University campus and used in

providing electric and water service to residents of the off-campus area. A Certificate of Public Convenience and Necessity was granted to Duke Power Company to render electric and water service to those customers presently served by the lines sold to Duke Power Company.

Order E-938, issued October 15, 1964, authorized Carolina Power & Light Company to cancel Seasonal Cotton Gin Service Schedule CG-1A.

Order E-939, issued December 9, 1964, approved Duke Power Company's reduction in electric rates that will save South Carolina customers approximately \$720,000 annually.

Order E-940, issued December 21, 1964, authorized Duke Power Company to sell \$40,000,000 First & Refunding Mortgage Bonds, 4.50% Series, due 1995, proceeds to be used in construction program.

Order E-941, issued December 29, 1964, approved Carolina Power & Light Company's reduction in electric rates that will effect a substantial savings to the customers of Carolina Power & Light Company.

Order E-942, issued December 29, 1964, approved South Carolina Electric & Gas Company's reduction in electric rates that will result in a substantial savings to the customers of South Carolina Electric & Gas Company.

Order E-943, issued January 27, 1965, approved South Carolina Electric & Gas Company's prescribed accounting treatment with respect to the Investment Tax Credit.

Order E-944, issued March 4, 1965, approved Amendment to Service Regulations of Carolina Power & Light Company.

Order E-945, issued April 21, 1965, authorized Carolina Power & Light Company to adopt General Service Schedule GE-1A superseding General Service Schedule GE-1.

Order E-946, issued April 21, 1965, set a date of May 19, 1965, for hearing Carolina Power & Light Company's request to sell and Duke Power Company's request to buy a sub-station site in Greenville, and a 115,000 volt transmission line between Greenville, S. C., and Davidson River, N. C.

Order E-947, issued April 21, 1965, set a date of May 19, 1965, for hearing Clinton Cotton Mills & Lydia Cotton Mills request to merge, after which to be known as Clinton Mills.

Order E-948, issued April 26, 1965, authorized Kershaw Oil Mill to adopt revised Commercial Electric Service Schedule C-1.

Order E-949, issued May 11, 1965, authorized South Carolina Electric & Gas Company to effect a two-for-one split of its outstanding Common Stock.

Order E-950, issued May 12, 1965, authorized South Carolina Electric & Gas Company to issue \$869,000 principal amount of its First and Refunding Mortgage Bonds 3% 1980 Series for Sinking Fund requirements.

Order E-951, issued May 25, 1965, authorized the merger of Clinton Cotton Mills and Lydia Cotton Mills into Clinton Mills. Authorized Clinton Mills to operate the electric distribution properties formerly owned by Clinton Cotton Mills and Lydia Cotton Mills.

Order E-952, issued May 25, 1965, approved the sale by Carolina Power & Light Company of the Davidson River-Greenville section of Carolina's Canton-Greenville transmission line and Greenville, S. C., substation to Duke Power Company.

Order E-953, issued June 2, 1965, authorized Carolina Power & Light Company to adopt Underground Street Lighting Service Schedule SL-2, and Public Housing Project Service Rider No. 18B.

Order E-954, issued June 15, 1965, authorized Carolina Power & Light Company to sell to South Carolina Electric & Gas Company 39.09 miles of 115 KV transmission line between Saluda station and the Wateree River.

Rural Electrification

When the use of electric service for lighting and power was begun late in the last century, the first customers to make use of this new convenience were those concentrated in the larger cities and towns where a large number of customers who were near the generating stations, could be served with a minimum of lines and equipment. Those who lived a long way from the generating stations, and particularly those in rural areas could obtain service only at great expense, usually to themselves.

During the 1920's there was a great increase in the use of electric service throughout the United States and particularly in South Carolina where numerous small towns sold their electric generation and distribution properties to the privately-owned utilities who immediately began connecting these towns with high power transmission lines so as to provide more dependable service to consumers. At the same time, "country folks" near some of these transmission lines were provided service.

Although it was considerably more expensive to provide rural service, a large number of rural inhabitants secured electric service, sometimes building their own lines to connect with the urban distribution lines.

The Commission's Annual Report for the year ending December 31, 1932, indicated that eight of forty rural electric extensions investigated by the Division (which was organized and set up under an Act of General Assembly, approved by the Governor on April 8, 1932), had been constructed by the Electric Utilities involved, and these lines were built without formal Hearing or Order before the Commission.

During the 1933 session of the General Assembly, Act 275 was passed and signed by the Governor on April 29, 1933. Under this Act, the State Highway Department was instructed to construct and maintain an electrical system "to procure as far as practicable an abundant and cheap supply of electric light and power for use of the Department for traffic improvement and maintenance of the State system of highways and to obtain, as incidental thereto, and in connection therewith, service of light, heat and power for the industries and homes of the farmers of the State under the most economical conditions." The Electric Utilities Division of the Railroad Commission (name later changed to the Public Service Commission) was instructed to

assist in making surveys, estimates of costs, rate making, designs and other necessary matters. The Highway Department was also empowered to borrow not less than \$100,000 from the Reconstruction Finance Corporation, under the Federal "Emergency Relief and Construction Act of 1932" to carry out the purposes of the Rural Electrification System authorized by the General Assembly.

Major Arthur R. Wellwood was chosen to direct the project and hearings were held in September. Attendance at these hearings indicated the great interest of the people of South Carolina in rural electrification and fifty-three groups filed applications for service during the hearings. The Report filed by Major Wellwood and his assistants on December 15, 1933 covered 440 widely distributed line extensions to serve 16,839 potential customers.

The entire country was in the depths of the "Great Depression," and the federal government was making federal money available for a large number of "make work projects." Early in the fall of 1934, the Electrical Utilities Division and the Commission made application to the Federal Emergency Relief Administration for funds with which to make a "Rural Electrification" survey of South Carolina.

During January, 1935, Senator James F. Byrnes advised the Commission that funds had been allotted for the survey. This survey under the direction of the Electrical Utilities Division was begun on February 1, and by the middle of that month, information was being gathered from every county in South Carolina.

Construction standards were established and unit costs determined so that the cost of each proposed rural line could be estimated. The survey also determined the amount of power probably to be used on each of the proposed lines. From this information, it could be determined whether the line could be justified and constructed.

After exhaustive study by the engineering and legal staff, it was determined that a separate organization, rather than the Electrical Utilities Division would have to be set up to handle the rural electrification of South Carolina, so that Public Works Administration money could be obtained.

With the help of Public Works Administration legal talent, a bill was drafted for submission to the South Carolina General Assembly.

This Act was approved by the Governor on March 14, 1935, and the State Rural Electrification Authority took over the task begun by the Electrical Utilities Division personnel.

The Rural Electrification Administration was created by Executive Order of the President on May 11, 1935. The Order, which was numbered 7037, was less than two pages long, and it granted powers to an REA Administrator to "initiate, formulate, administer, and supervise a program of approved projects with respect to the generation, transmission and distribution of electric energy in rural areas."

The Rural Electrification Act, signed by President Roosevelt on May 20, 1936 established REA as a lending agency and granted clear preference to non-profit organizations.

In 1937 the Rural Electric Administration drafted a model law for the states called the "Electric Cooperative Corporation Act" and by 1940 there were 23 states which had adopted legislation based on this model law. The Governor approved the South Carolina Rural Electric Cooperative Act on May 12, 1939.

As rural electric cooperatives were set up in South Carolina, the lines planned and constructed by the South Carolina Rural Electrification Authority were merged into plans and construction of the cooperatives and the South Carolina authority was released from its authority and responsibility for the construction and operation of rural lines in South Carolina.

The people of the United States were beginning to forget the great depression and were ready for the labor saving appliances that electric service could provide, and since people now could pay for electric service, every organization providing electric service in South Carolina began a crash program to build as many electric lines to serve as many customers as possible.

The Electric Utilities Division continued to make surveys of proposed rural electric line extensions and passed on to the utilities, the municipalities and the rural electric cooperatives such information as was collected so that on June 30, 1940 there were 10,493 miles of rural electric lines serving 54,905 customers.

During World War II the construction of rural lines was slowed down so that vital materials could be used in the war effort. As of June 30, 1945 there were 18,474 miles of line with 90,292 customers, a great many of the additional customers being connected to existing distribution lines with short service drops.

During the period 1945-1949 the material situation was much better and by June 30, 1949 there were 32,183 miles of rural

electric distribution lines serving 180,719 rural customers of the REA financed cooperatives, the municipalities, the privately-owned utilities, Greenwood County Electric Power Commission and South Carolina Public Service Authority (Santee Cooper).

As of July 1, 1960 there were 48,529 miles of rural electric lines serving 302,967 customers—and a large number of customers who had been reported as “rural” in previous years were now in areas that had been annexed to towns and cities in South Carolina, and were not included in the figures showing rural customers as of July 1, 1960.

By the end of December 1960, the cooperatives in South Carolina were operating more than 34,000 miles of rural electric distribution lines to serve nearly 143,000 customers whose average monthly residential use has increased to about 291 kilowatt-hours per month, comparing very favorably with the national average annual residential electric use which was 3,790 Kwhrs, or about 316 Kwhrs, per month.

As of July 1, 1962, there were 50,392 miles of rural lines in South Carolina serving 319,096 customers, and many thousands of additional “sub-urban” customers are receiving the same reliable central station service enjoyed by city customers.

At the end of 1964, the twenty-three Cooperatives in South Carolina were serving more than 162,600 customers, and it is believed that the average Kw-hr. consumption and average rate paid by these customers is below that of the average United States customer.

The average annual use of electric service by those living in rural areas of South Carolina is now very near the average annual use of electric service for domestic purposes throughout the entire United States. The average cost per kilowatt-hour of residential service in urban and rural areas of South Carolina is the same when it is furnished by the privately-owned utilities and this average of 1.932 cents per kilowatt-hour is well below the national average of 2.30 cents. The average residential rate paid by customers of REA cooperatives and other public-owned electric lines is also below the national average rate.

The growth of rural electrification in South Carolina has been very rapid. There are now nearly half a million rural and sub-urban electric customers in South Carolina receiving central station service; that is, they are served by the same generating stations that serve the urban customers. It is believed that prac-

tically every rural and suburban home in South Carolina that desires electric service now has or can secure electric service. Of course there are isolated cases where several miles of line would be required to serve a single home far removed from other homes, or even a fishing shack on a river, and where the cost of providing service is greatly out of proportion to the use to be made of electric service.

The big job left to be done by those selling rural electric service is in connecting those customers living on present lines who for various reasons have not secured electric service and those new customers who build new homes adjacent to present lines and in increasing the capacity of present lines to take care of the greatly increased loads due to the use of more and more time-saving and money-saving convenient electric appliances.

The Commission and staff have always worked with all potential electric consumers and have helped thousands of them to secure central station electric service.

Accounting

During the past fiscal year, the accountants of this Division have made numerous studies and given close scrutiny any matters pertaining to accounting of the privately owned electrical utilities operating in South Carolina. Studies were made of operating revenues, operating expenses, capital expenditures, net income and other accounting details of these utilities in order to furnish pertinent data and other information that the Commission may desire.

The privately owned electrical utilities operating in South Carolina during the past fiscal year passed on to their customers in the State approximately \$1,180,000 in rate reductions. These reductions were due to the reduction of 2% in the Federal Income Tax Rate, completing the 4% reduction from 52% to 48% which was spread over a two year period.

Also during the past fiscal year, studies were made and conferences held in connection with the continued expansion program of these utilities relating to financing to keep pace with the continued industrial growth of the State. These expansion programs extend over a period of years and it is necessary each year for further financing to be done in order to carry out the proposed long range program. Securities for financing this expansion cannot be issued by the companies without first getting the approval of the South Carolina Public Service Commission.

The following financing and re-financing was approved during the last fiscal year:

Duke Power Company, Charlotte, N. C., to issue 11,464,447 additional shares of common stock without par value, for the purpose of effecting a "stock split" of the Company's outstanding common stock on the basis of two (2) shares for one (1), by the issuance to each holder of shares of common stock of the Company, one additional share of such stock of the Company held by such stockholder.

To issue and sell \$40,000,000 of its First and Refunding Mortgage Bonds 4½% 1995 Series, proceeds to be used in construction program.

South Carolina Electric & Gas Company, Columbia, S. C., to issue 4,073,058 additional shares of common stock, \$4.50 par value, for the purpose of effecting a "stock split" of the Company's outstanding common stock on the basis of two (2) shares for one (1), by the issuance to each holder of shares of common stock of the Company, one additional share of such stock of the Company held by such stockholder.

To issue and sell \$869,000 of its First and Refunding Mortgage Bonds, 3% 1980 Series for Sinking Fund Requirement.

Duke Power Company was authorized to sell to the City of Gaffney certain electric distribution lines and equipment located in recently annexed territory for a cash consideration of \$37,842.00.

Clemson University was authorized to sell to Duke Power Company the electric and water distribution system located off the University campus for a cash consideration of \$279,068.00.

Approval was given to Clinton Cotton Mills and Lydia Cotton Mills to merge into Clinton Mills.

Carolina Power & Light Company was authorized to sell to Duke Power Company certain transmission line and substation for a cash consideration of \$435,006.88.

Carolina Power & Light Company was authorized to sell to South Carolina Electric & Gas Company certain transmission line for a cash consideration of \$331,000.00.

The companies having steadily increased the facilities to take care of the demand for power, have steadily increased their operating revenues. The gross electric revenues for the year ended December 31, 1964, were as follows:

<i>Utility</i>	<i>Gross Electric Revenues</i>
Carolina Power & Light Co., Raleigh, N. C.	\$ 19,019,149.01
Clinton Cotton Mills (Village) Clinton, S. C.	40,683.81
Duke Power Company, Charlotte, N. C.	64,123,073.23
Heath Springs Light & Power Company, Heath Springs, S. C.	100,447.13
Joanna Community Corporation, Joanna, S. C.	57,828.59
Kershaw Oil Mill, Kershaw, S. C.	194,989.12
Lydia Cotton Mills (Village) Clinton, S. C.	34,807.52
Lockhart Power Company, Lockhart, S. C.	1,875,002.00
South Carolina Electric & Gas Company, Columbia, S. C.	59,990,575.68
The Electric Company, Fort Mill, S. C.	173,722.68
TOTAL	\$ 145,610,278.77

While the gross revenues have increased, correspondingly materials, supplies and other operating costs have increased.

SOUTH CAROLINA ELECTRIC REVENUES (Gross)

1936 to 1964 inclusive are as follows:

1936	\$ 17,250,968.99
1937	19,058,975.63
1938	18,632,174.46
